

This is SEOM

We are Sollentuna residents' own energy and environmental company. Our focus is to provide services and products that are best for our customers and the municipality. Surplus generated in the business goes back to the municipality's various businesses and to you who live here.

We develop, build and maintain infrastructure in Sollentuna for sustainable and safe deliveries of electricity, district heating, fibre, cable TV, water and waste management.

Our vision "We simplify your everyday life and make Sollentuna more sustainable" permeates everything we do.

Our responsibilities:

URBAN NETWORK (FIBER)

Internet, cable-TV and telephony

POWER TRADING

100 % renewable electricity to all customers

DISTRICT HEATING

Climate smart heating

ELECTRICITY GRID

Reliable and cost-effective

WASTE & RECYCLING

Save money and the environment by recycling

WATER

We supply you with clean water

ELECTRIC CAR CHARGING

Charging box package with installation

SOLAR CELLS

Solar cell packaging with installation

SOLLENTUNA ENERGI & MILJÖ

You are a part of Sollentuna

As a resident of Sollentuna, you are an important part of our work to create the best place to live and work.

SEOM = energy & environment

SEOM is your local energy and environmental company.

We develop, build and maintain infrastructure in Sollentuna such as electricity, district heating, fibre, cable TV, water and waste management. Our products and services should have the lowest possible climate and environmental impact and contribute to making your life more sustainable.

Our surplus goes back to the municipality's various activities and to you who live here, as we are a municipality owned company.

Together we make
Sollentuna more
sustainable

Electricity, the first thing you need to fix

When you move in to your home, you must sign an electricity network contract. You do that with us at SEOM, as we are the electricity grid owner. Notify your move well in advance so we can ensure that you have electricity in your home the same day you are moving in.

You also need to sign an electricity trading contract. Here you can choose any supplier you want. If you do not actively choose an electricity trading supplier, we make sure that you get a variable electricity contract without a commitment period at the same favorable price as if you had chosen yourself. If you are not satisfied, you can change the contract form or choose another electricity supplier at any time.

When you move out, the notice period is 30 days on the electricity network contract. The notice period for electricity trade contracts depends on which supplier you have chosen.

Be a sorting champion

In Sollentuna, we sort our waste. In average, each resident sorts out about half of their food waste. It's good, but we need to do better! Sorting waste is so simple but does so much for our environment. Join us and become a sorting champion, you too!

Start up

This kit contains most of what you need to start sorting your food waste. It is both materials and information about how to recycle and sort your waste, such as food.

Sort and recycle

Food waste

The brown paper bags included in this kit is for your food waste. Put the paper bag in the bag holder. The food waste bag is specifically adapted for food waste. Use only bags intended for this. Your food waste then turns to biogas and biofertilizer. Awesome, right?

- Allow wet food waste to drain before placing it in the bag.
- You can put a small amount of paper towels in the bag to absorb moisture.
- The same bag can be used for several days.
- Just fill the bag up to the dotted line on the bag.
- Be sure to seal/fold the bag well before leaving it for recycling.

Residual waste in the garbage bag

In the ordinary garbage bag you leave materials that remains after you have sorted out everything else that can be recycled such as food waste, packaging, newspapers and textiles. Most things can be recycled. If you are really good at recycling, it will take a long time before the garbage bag is full. And that's good for the environment!

Want to learn more about sorting and recycling? Scan the qr code on the right.

Mobile Recycling Center

We have a Mobile Recycling Center that is set up at various locations in the municipality at regular intervals. You find more information regarding the timetable and what you can leave here by scanning the qr code on the right or go to seom.se.
